

## PROFILE

My name is Wouter Geerlings. I'm a father of two, with a passion for design and development. Currently I am working as a teacher where I make graphic design and development available to students with special needs. I also create a variety of projects through my own company. In my spare time I like to work on cars, play some computer games, taste different types of whiskeys, do some snowboarding and spend time with my family.

## EXPERIENCE

Oct. '17 - Present

### DERK INTEGRATED SYSTEMS

Building a communication tool for small businesses and GP's. In addition to this platform we also created a custom cms for easy to setup websites and webshop. Via the restful API the platform and platform are single sign-on. Next to these products we also created a narrowcasting. The cms for the narrowcasting is done through the platform and it cast via the API to the Raspberry-pi(s).

- » NodeJS
- » Vue
- » JWT
- » WebComponents
- » Laravel
- » CLI

Aug. '11 - Present

### REA COLLEGE

Creating and giving lesson to students with special needs about development and graphic design. In addition to this I also created a lessons and administration platform for documentation about the students. This platform is used by teacher for the documentation and by students for there lessons/instructions.

May. '10 - Dec. '17

### PUBLISH VISION

Creating a great diversity of websites, webshops and small web/browser-based applications for clients. In the beginning most of the websites where created using Flash and Action script 2.0 and 3.0. After a while these products started to move more toward html and css. The applications where manly based on html/css, php and MySQL at the time.
